

## eTwinning

This school year, our students were involved in three eTwinning projects: "Reveal the folk meteorology", "LEARN - Languages are Easy with Active Reading and Narration" and "Charlie and the Chocolate Factory". The first of these projects was carried out as part of educational lessons by class 2B4 with an extended scope of teaching mathematics, geography and English. It concerned folk customs and proverbs about the changing seasons and the impact of these changes on everyday life. As part of the project, participants conducted interviews with older family members and developed comics illustrating proverbs referring to changes in the calendar. The project culminated in a videoconference organized on April 15, 2021. The project was coordinated by the Gimnazija Fran Galović school from Koprivnica, Croatia.
